

DuraTech USA, Inc

Rugged Laptops, Tablets and PDAs

This breakthrough technology is setting the standard for police & fire department vehicles of the future!

1. Project 54 integrates all supported devices in the patrol vehicle to operate by simple voice command keeping the officer's eyes and hands on the wheel.
2. Increases Officer & Public safety
3. Enhances response time to calls
4. Change radio frequencies by voice command
5. All devices operational through Voice, Touchscreen or Traditional methods
6. Free up dispatchers
7. Less traffic on radio frequencies
8. Access to Motor Vehicle / NCIC information (varies state to state)
9. Reduce insurance claims and liability
10. and more.....

DuraTech USA, Inc. is proud to be an authorized distributor and complete solution provider for Project 54
Project 54 was developed by the CATLab at the University of New Hampshire and funded by the Department of Justice

iX104C2 - Rugged Tablet PC

The iX104C2 is designed to meet the needs of mobile enterprise users while providing rugged features that protect and extend the system's life span and enhance reliability. Over 30 unique rugged characteristics counteract and minimize damage in harsh environments or if the iX104C2 is dropped, struck, or exposed to constant vibration. iX104C2 tablets are engineered, third party tested, and warranted to US Military Standards (MIL-STD 810F) for environmental extremes.

W130 - Fully Rugged Notebook

The W130 beautifully combines the best of an ultra-lightweight notebook with the strength and durability you'd expect from DuraTechUSA. Featuring an Intel® Centrino™ 1.6 GHz processor and up to 1GB DDR RAM, the W130 rugged mini-notebook is designed to offer optimal reliability in environments where conventional notebooks fail. At less than 6 lbs., it is ready to go wherever you need to go, no matter the environment, no matter the weather.

10.4"/12" Mobile Touchscreen Monitor

This monitor offers you the convenience of a touch screen at a space-saving size. It supports display resolution up to 800x600 (SVGA). Use the convenient touch-screen as your input device, control your mouse cursor or the mini on screen keyboard that comes with your operating system. The stand can also be removed for use with any VESA mounts with an optional VESA mounting plate, making it perfect for in-car computing or home automation purposes.
